

Higher categories of Gryllidea (crickets) represented in FSCA

Names used are those recognized by [OSF Online](#) unless noted otherwise.

by T. J. Walker and Katherine Arguez (August 2017)

Order Orthoptera, Suborder Ensifera, Infraorder Gryllidea

Superfamily Gryllotalpoidea

Family Gryllotalpidae

Subfamily Gryllotalpinae (2 genera, 4 spp.)

Subfamily Scapteriscinae (1 genus, 7 spp.)

Family Myrmecophilidae (1 genus, 4 spp.)

Superfamily Grylloidea

Family Gryllidae

Subfamily Gryllinae

Tribe Cophogryllini (1 genus, 1 sp.)

Tribe Eumodicogryllini (1 genus, 1 sp.)

Tribe Gryllini (8 genera, 46 spp.)

Tribe Landrevini (1 genus, 1 sp.)

Tribe Modicogryllini (5 genera, 8 spp.)

Subfamily Sclerogryllinae (1 genus, 1 sp.)

Subfamily Eneopterinae*

Tribe Diatrypini (1 genus, 4 spp.)

Tribe Eneopterini (1 genus, 1 sp.)

Tribe Hapathini (6 genera, 41 spp.)

Tribe Lebinthini (1 genus, 1 sp.)

Tribe Paroecanthini (2 genera, 5 spp.)

Tribe Talfaliscini (1 genus, 7 spp.)

Tribe Xenogryllini (2 genus, 2 spp.)

Subfamily Oecanthinae

Tribe Oecanthini (1 genus, 37 spp.)

Tribe Xabeini (3 genera, 11 spp.)

Subfamily Pentacentrinae (1 genus, 3 spp.)

Subfamily Podoscirtinae (1 genus, 1 sp.)

Family Mogoplistidae (5 genera, 20 spp.)

Family Phalangopsidae (8 genera, 14 spp.)

Family Trigonidiidae

Subfamily Nemobiinae (8 genera, 29 spp.)

Subfamily Trigonidiinae (7 genera, 41 spp.)

**Caribbean Crickets*, by Daniel Otte and Daniel Perez-Gelabert (2009), assigns tribes to Eneopterinae that [OSF Online](#) assigns to other subfamilies. For the FSCA Ensifera collection, we use the classification used in *Caribbean Crickets* because that work seems likely to remain the foremost work on the crickets of that region for the foreseeable future.
